

**SSN COLLEGE OF ENGINEERING  
DEPARTMENT OF CSE**

**C PROGRAMMING LABORATORY (CS8261)**

**Ex. No. 7 Programs using Functions**

1. Generate the salary slip of a single employee using structure and functions. Use separate functions for getting input, computing and displaying output. Pass the structure by reference. Display the pay slip with proper formatting. **(Hint: Take the required data from Ex. 1)**
2. Compute internal marks of  $n$  students for five different subjects using structures and functions. Use required data as the members of the structure. **(Hint: Use pointers to return the array)**

***Note: No global declaration should be made.***
